Breaking News!

98% of our children agree that they are happy at school,
of which **70%** strongly agree

Thank you to everyone who participated in our Parent Survey.

Please remember our e-safety protocols, whilst we are all so busy using the internet. Be vigilant and continue to monitor the website and the interactions our children are having.

Next week we welcome our Nursery children back on site. All Nursery parents who filled in the survey, should have received a confirmation email this week.

Parent consultations will now be postponed to after half term. Confirmed dates will be issued in due course.

Keep well and I will keep in touch.

Ms A. Parker

Lead Headteacher

The Value for February is 'Patience'

SCHOOL STREETS

Lambeth Council are consulting on School Streets until 2nd March 2021. Parents and staff, as well as local residents, are invited to share their thoughts via this website:

Independent Learning Outcomes

Whilst we are grateful for the parental involvement and support with home learning, be mindful of the amount of support you are giving with the children's outcomes (work submitted). We need, as best we can, to be able to see what the children can and cannot do, on their own. We use this information to inform the lessons that will follow. The outcomes of the children's work is not a judgement of your ability to support them, it is a part of the cycle of teaching and learning, which is a layered process. By all means, help them unpick their understanding, answer their questions as best you can, even give them little reminders as they go, then let them show you what they can do. Our children know how to correct their mistakes using the steps to success. Support them to work harder than you!

98% of children agree that they feel safe at school, of which 74% strongly agree!

Boot Camp Success!

So far this week, we have welcomed 61 of our home learning children (ranging from Nursery to year 6) onsite engaging in our Boot Camp. A much needed break from screen time and the opportunity to physically interact with their peers. Next week we will welcome Years 3, 2, 1 and Reception. Once a sibling pupil has attended, they have used their place. Whilst we are unclear how long the school closure period will be in place for, we will repeat boot camp only periodically. Please note, Boot Camp is only available for those child/ren who are not attending the onsite provision. I will let you know when we will be able to have another boot camp week. In the meantime, we look forward to seeing the rest of you next week.

Early Years Foundation Stage

Nursery Catch-Up Meeting Update

This week we have been busy exploring under the sea! We thought about how we can look after and protect our oceans, including all the creatures who live there. We have researched lots of sea life who live in all parts of the oceans around the world (even the ones in the deep deep ocean!). We loved reading poems about them in our book of the week 'Commotion in the Ocean' and after reading our book expressed our thoughts and ideas, telling each other which poems were our favourites and giving reasons for our choices.

In **phonics** this week we have been getting creative with body percussion, using different parts of our bodies to tap out rhythms. A real highlight this week has been singing songs with all our friends and seeing everyone's smiling faces joining in with the words and actions in the online lessons.. it almost feels like we're all in a real classroom together again which makes us feel very happy!

In **Maths** we have looked at 2D shapes and have been on hunts to find shapes around us, making sure we're using our key words of shape names and sides and corners. We are excellent shape hunters and found examples of circles, triangles, squares and rectangles!

Nursery home learning

Reception Catch-Up Meeting Update

Literacy – Through our topic book 'Clean up', we have learnt about marine life and looking after our planet. We have created a poster to help educate others on the dangers of plastic pollution, designed our own surfboard and wrote a sentence about it.

Maths – In Maths this week we have been learning to add. We have been explaining our understanding of addition using key words including more, total and altogether. We have been solving addition problems and have checked our answers to prove they are correct by using a range of resources.

PSED – The children eagerly shared their favourite objects and what they did with them, discussed where they would go on holiday and why and had a small discussion on steps we could take to help better our planet.

EAD – Under the theme of 'recycling' the children have focused on exploring and experimenting with different materials they can reuse to create a piece of art!

KUW - In knowledge and understanding of the world the children looked at the effects plastic pollution has in our environments and discussed what we could do to help. We also looked at floating and sinking and investigated whether an object would float or sink.

PE - In PE the children explored the different ways a sea creature might move and practiced making those actions.

KS2 Notice

Thank you for everything that you are doing to support your children with their learning through Google Classroom. Please remind your children to participate fully in the live teaching sessions as they are for their benefit. They should be listening to the instructions and taking part in the lessons, just as they would at school. Please also remind your children to be patient when waiting to speak to a teacher during a live session. If you are still having trouble accessing Google Classroom, Oxford Reading Buddy, Collins, Big Cat, Times Table Rockstars or MyMaths, please contact the school as we are happy to help.

Year 3 Catch-Up Meeting Update

In English this week, we introduced children to the features of persuasive writing. Next week we will build up to children writing their own persuasive writing pieces.

This week in Maths we learnt about 3D shapes and how to read and interpret bar charts, block charts and pictograms. Next week we'll be doing multiplication and learning the grid method for multiplication.

This week in Topic we learnt about 'The Blitz' and next week we'll have a virtual WW2 Blitz Workshop with the National Army Museum.

This week in Science, we made predictions about magnetic materials and watched an experiment that tested them out. Next week we will investigate whether all coins are magnetic.

This week in Art, children practised a variety of sketching techniques and next week the focus will be shading.

This week in PSHE we continued the E-safety lessons and we will continue these next week.

Spellings will be posted on google classroom on Friday to be tested the following Thursday.

Year 3 Evania and Iris made a Hindu shrine at home

The Value for February is 'Patience'

Lower Key Stage Two

Year 4 Catch-Up Meeting Update

We've come to the end of another week of home learning, and again we feel very proud of the children who are committing 100% to the lessons and their tasks. All of your hard work is not going unnoticed, keep it up!

In Maths next week, we are doing multiplication! We'll be using our known times tables to consolidate using formal written methods. We'll be finding fact families as well, and looking for patterns in common times tables.

In English, we are finishing our two-week cycle on non-chronological reports. As the weeks gone on, the children have collected research and been improving their skills of writing this up using subheadings and bullet points. These skills will come in handy next week, as they'll be writing their very own non-chronological report on Peru!

In Science, the children will be looking at insulators and conductors of electricity. They will be thinking about what materials would conduct electricity and which ones wouldn't. They'll then be deciding which ones would be best to use in a circuit.

In Art, we are continuing with our art topic using the artist David Hockney. This week, the children had a go at sketching their favourite landscape in the style of David Hockney. Next week, they will be adding colour to their sketch, with a key focus on contrasting and complimentary colours.

In Topic, we're going back to geography next week! The children will be finding out all about the UK and using geographical language to describe it.

Please remember, the children should not be on our google meet link without Miss Walker or Miss Neate present. We also want to remind the children that our lessons are recorded, along with the chat, so please make sure you are only using this for things need you too.

Year 4 Art Inspire

Please remember to login!

EYFS & KS1-Reading– Oxford Reading Buddy/ Phonics– Reading with phonics

KS2- Reading– Big Cat Collins

Year 4 Art Inspire

Upper Key Stage Two

Year 5 Catch-Up Meeting Update

On Tuesday 26th January year 5 parents/carers joined our meeting to discuss learning for the week and plans going forward. This week in English we are learning to write non chronological reports/fact files. In Maths the children have been consolidating their learning about geometry- the study of shapes angles etc. In Topic, they have been researching a range of famous black people in history. We have been carrying on with our study of 'Sikhism' in RE. The children have really enjoyed their PE lessons with Mr Wright. Unfortunately, we couldn't give an answer to one parents question about when the children would be returning to school. We did encourage parents to use whatever resources they have at home and not to worry too much about fitting everything in to the allocated time slots. Most importantly we want the children to be happy and safe!

Year 6 Catch-Up Meeting Update

The Y6 team would like to thank you all for your continued support and encouragement in engaging the Y6 children in their remote learning. We have been really busy and it's been lovely to see so many children engaged in the live sessions, participating and submitting their work.

Please note we deliver live sessions, which the children should be attending for Maths, English, Guided Reading, one PE session per week, a Circle Time and PSHE session and starting next week Music will be live too. The children are expected to attend all the live teaching sessions. We would like to remind you of the importance of attending the live sessions and if the children are unable to attend these to watch the recordings afterwards as these really will support them in their understanding.

English: Over this week and next week we have been and will continue to look at a non-fiction unit on Biographies. This week, we focused on the organisational and language features (in particularly fronted adverbials and extending sentences) and the building blocks of the genre. Next week, the children will carry out their own research and write their own biographies on great Americans of colour, linking in with our Topic 'Route 66'

Maths: This week we have been looking at Algebra. This is new to us all in Year 6 and there have been some misconceptions that arose last week, so we linked it to sequencing and recognising patterns in the number system. This is an area that many of the children need to work more on. Can we recommend that if your child/ren is finding it difficult that they jump back into the Google Meet, where the teachers are there to support and help. Next week, we are moving on to Multiplication. We will focus on the short and long term written methods and multiplying by decimals. We would love for the children to access Times Tables Rock Stars to help their multiplication knowledge

Art: Next week, we are going to look at a famous American artist.

Science: This week in Science, we looked at how we see and how light travels in straight lines

Humanities: This week we looked at some key physical features of America – both human and physical features – and using geographical language to describe them. Over the next weeks we will be Historians finding out about, putting on a timeline, of key events in American history including The Great Depression, American Revolution, Cold War, Civil Rights Movement, The First Thanksgiving, California Gold Rush and the Abolition of Slavery.

PSHE: Our focus is 'Staying Safe' so we have been delivering live sessions on E-Safety, which is extremely important in these times especially and allows for lots of relevant and engaging discussions.

FAB FUNDRAISING THIS YEAR WILL BE VITAL, we need your continued support!

Donations may be eligible for gift aid – please email fab.treasurer01@gmail.com for a gift aid form and return the completed form via email to allow gift aid to be claimed.
