

Partnership Vision

Working together to secure the best possible outcomes for children, in line with the culture and diversity that exist within each school.

Leaders will support and empower each other to ensure no school is left behind.

We will be relentless in our mission to enable each school to set high expectations for all, ensuring these expectations are met.

Friday 18th June 2021

The course of the past year has been incredibly busy for the Partnership. Developing crucial relationships during the pandemic has been challenging for us all. Despite this, the school communities have continued to pull together through joint Executive senior meetings and teacher planning. As a result, we have seen continued improvement in our priority areas of curriculum, assessment and teaching. Well done to all of our staff for everything that has been achieved over the past year.

This week, Stockwell had their first Section 8 Ofsted monitoring visit since their last inspection. Thank you to everyone for their support during this process, including our Network Teams of Subject Leaders across our schools. We will update you when we hear more.

Thank you to everyone who contributed to the consultation process for the Hard Federation of our 3 schools. Both governing boards are considering the responses and will provide you with an outcome letter in due course.

Have a lovely weekend.

Ms A. Parker
Lead Headteacher

Science Deep Dive

On Thursday 10th June, we conducted a deep dive of our science curriculum and outcomes across our schools. The aim was to monitor the standards of teaching, learning and the consistency in pupils work. We would like to thank our teachers for working hard to plan such engaging lessons, which are evidenced in the quality of the children's work across our schools. We would also like to congratulate the Science Network Team for securing high standards and supporting teachers to embed such a rich Science experience for our children. Bring on Science Week!

Pen pals

'Writing for a purpose'

To develop links between classes within the schools, and opportunities to get to know each other, children from year 1 to 4 have taken part in a pen pal project. They have been writing to their peers in one of our partner schools and will be receiving their replies soon.

Climate for learning

Racial Equality in Schools

This year, along with all other Lambeth schools, we created Racial Justice Champions in each of our settings, to lead on raising awareness of racial inequalities in education. Ms McIntosh (Bonneville), Ms Banton (Jessop) and Mr Taylor (Stockwell) were trained to deliver training on creating an enabling, equitable environment for all. We thank them for supporting our staff through this journey.

Transition

'Here we are'

To support our children's transition back to school, based on the joint lived experience of lockdown and the school closure period, all children read the book 'Here We Are' by Oliver Jeffers. Taking inspiration from this, they created artwork for the school displays as well as contributing to year group books for classrooms.
